Expert Evaluation of LLM-Generated Architectures (Blind Review)

Thank you for contributing to this expert evaluation!

You will assess three architectural proposals (Architecture A, B, and C) for two systems (Bookstore and PetClinic).

Each proposal was generated using a different approach (implemented, zero-shot, few-shot), but you will evaluate them blindly—without knowing which is which.

Your feedback will be used exclusively for academic research.

The evaluation is divided into two parts: a quantitative assessment and a qualitative feedback section.

Please answer each section carefully and honestly.

Informed Consent Form

Before starting the evaluation, please read and agree to the informed consent statement below.

I declare that I have been informed about the nature, objectives, and procedures of this research, which aims to analyze the quality of system architectures generated by Large Language Models (LLMs).

I understand that:

- *My participation is voluntary and I may withdraw at any time without any consequences.*
- *My answers will be kept anonymous and confidential, and will only be used for academic purposes.*
- *No identifying information will be shared in any publication or report.*

I hereby agree to participate in this study, having read and understood the terms above.

1. I have read and agree to the terms above *

Marque todas que se aplicam.

☐ yes

Reviewer Identification and Evaluation Context

Please provide basic identification and specify which system and architectural proposal you are evaluating.

2. Software Engineer Identification *

- ◯ Eng 3
- ◯ Eng 4
- ◯ Eng 5

3. System under Evaluation *

Marcar apenas uma oval.

- ◯ BookStore
- ◯ PetClinic

4. Architectural Proposal *

Marcar apenas uma oval.

- ◯ A
- ◯ B
- ◯ C

Part I – Quantitative Assessment

Please rate the architecture across the following dimensions using a 1–5 Likert scale:
(1 = Very Poor 2 = Poor 3 = Fair 4 = Good 5 = Excellent)

5. **Correctness**: To what extent does Architecture fulfill the system requirements *

1 2 3 4 5

☆ ☆ ☆ ☆ ☆

6. **Completeness**: How fully does Architecture cover the key services and behaviors? *

1 2 3 4 5

☆ ☆ ☆ ☆ ☆

7. **Modularity**: How well are responsibilities separated across services in the architecture? *

1 2 3 4 5

☆ ☆ ☆ ☆ ☆

8. **Plausibility**: Would you adopt Architecture in a real-world deployment? *

1 2 3 4 5

☆ ☆ ☆ ☆ ☆

Part II – Qualitative Feedback

Please provide your detailed observations regarding the architecture.

9. What are the main strengths of this architecture?

10. What weaknesses or risks do you identify?

11. Were there any surprising or non-obvious design choices?

12. What modifications would you recommend to improve this architecture?
